

NO DEATHS YESTERDAY IN CANADIAN CAMP

**LT.-COL. IRVING SATISFIED
WITH MEASURES TO PREVENT
THE SPREAD OF "FLU."**

(Canadian Press Despatch.)

Niagara Camp, Oct. 8.—Lt.-Col. L. E. W. Irving, Assistant Director of Medical Services for Military District No. 2, Toronto, paid an official visit to the Canadian camp this evening in connection with the outbreak here of Spanish influenza. He expressed satisfaction with the measures taken to prevent the further spread of the epidemic in camp. The influenza cases number about 200 now, only a few of them being serious, however. There were no deaths to-day. The condition of Captain Andrews, one of the chaplains of Niagara Camp, was reported to-night as being favorable.

It is probable that as a result of Col. Irving's visit and the condition of the camp as seen by him, the troops may leave for Toronto next Tuesday or Wednesday, and go into camp at Exhibition Park. Instead of remaining here till near the end of October, as was officially announced a short time ago would be the case.

The Railway Troops Depot, which is going to Hamilton, celebrated its last night in camp here to-night by having a bonfire and burning the Kaiser in effigy.

The camp Y. M. C. A. tent is being dismantled, preparatory to being removed to Toronto.

The camp sports are off for the remainder of the season here owing to the epidemic.

It is pretty well established that the "flu" was introduced into the Canadian camp by men returning from leave of absence and by new arrivals. In one small party of Canadians who came from the United States, under the auspices of the British Recruiting Mission, and arrived in camp last night, six were affected by influenza and had to go into hospital at once.

FORWARD MOVEMENT.

A number of Toronto ladies left yesterday for Smith's Falls to attend the twenty-ninth annual conference of the Baptist Women's Home and Foreign Missionary Society for Eastern Ontario and Quebec, which commenced last night. The keyword of the meeting is to be "Forward," and it is proposed to launch a forward movement in connection with the society.
