

CANADIAN HOSPITALS

CARE FOR AMERICANS

500 U. S. SOLDIERS WITH SPANISH INFLUENZA LAND AT DOMINION PORT.

(Canadian Press Despatch.)

A Canadian Atlantic Port, Sept. 21.—About five hundred American soldiers arrived at a Canadian Atlantic port yesterday suffering from Spanish influenza, and were removed to hospitals ashore for treatment.

The curling rink and two of the church halls were commandeered by the military authorities and turned into emergency hospitals. The worst cases have been taken to one of the military hospitals. It is understood that the first aid class and the home nursing class graduates will offer for service at the hospitals, and will assist with the care of the men. The chief difficulty was to get beds for the cases, and all day the authorities were busy with the work of securing and preparing beds for the sick to sleep on to-night. The men will remain under quarantine for several weeks and people have been warned to keep away from the buildings unless on business, as the disease is contagious.
