
FLU MICROBE IS SMALL.

—

**Cannot be Seen, Say the Scientists
but it is Identified.**

(Canadian Press Despatch.)

Paris, Oct. 15. — Dr. Charles Nicolle and his colleague, Dr. La Bailly, who isolated the microbe causing Spanish influenza at the Pasteur Institute at Tunis, of which Dr. Nicolle is Director, announce that the germ is too small to be visible with the microscope. It has been clearly identified, however, because by its use the malady has been reproduced in a monkey and a man.
