

QUEBEC BARRACKS ARE QUARANTINED

Spanish Influenza Breaks Out at Drill Hall and Citadel

(Canadian Press Despatches.)

Quebec, Oct. 2.—Spanish influenza has broken out here amongst the soldiers quartered at the drill hall and at the Citadel, and as a result both barracks have been quarantined. The order to have the barracks quarantined was issued by Headquarters here, and about 1,000 men are affected by the order.

Coroner Jolicoeur announced to-day that he would give out figures, facts and names to prove that there were a number of cases here, and that the Civic Health Bureau closed its eyes to the gravity of the situation.

Serious Situation in Montreal Dist.

Montreal, Oct. 2.—With a total of 24 deaths from the Spanish influenza and 746 cases from St. Johns and Montréal Barracks alone, it is evident that the epidemic is a reality and that with the increase of the epidemic among the military forces and the civilian population it is necessary to take every possible precaution to prevent the spread of the disease. Reports received by Gen. Willson of the spread of the disease among the soldiers of this Military District are: ten deaths of soldiers from St. Johns reported today; 23 deaths to date from St. Johns; 596 cases altogether reported from St. Johns; 13 new cases reported from St. Johns to-day; one death in the Montréal Barracks; 150 cases reported from Montréal Barracks to date.

Fourteen Deaths at Niagara.

Niagara Camp, Oct. 2.—The fight against Spanish influenza in the Polish Camp is progressing favorably, and to-

day the number of cases in hospital was down to 146, the lowest in a couple of weeks. There were only seven admissions yesterday, and the discharges numbered 22. There have been fourteen deaths so far.
