Steam Shovel is Used to Dig "Flu" Graves

New York, Oct. 28.—A steam shovel was used in one of New

York's cemeteries yesterday to dig a trench in which to inter temporarily the bodies of victims of Spanish influenza. This extraordinary procedure was made necessary by a shortage of grave-diggers coupled

with the large number of deaths.

At another cemetery there were 400 unburied bodies and city laborers have been drafted to prepare graves.

JAPAN HONORS TEDDY.

Tokio, Oct. 28.—With the approval of the Emperor, the Japanese Red Cross has awarded Colonel Theodore Roosevelt a medal of honor.
