

## **Austria Must Go Way of Bulgaria**

(Copyright in Canada, 1918. Special  
Cable to The Globe and The New  
York Times.)

London, Oct. 2. — The London  
Daily Chronicle's diplomatic corre-  
spondent says:

"Austria must go the way of Bul-  
garia, for the same social, economic  
and political pressure is at work.  
She is trembling on the brink of a  
revolution from exhaustion."

### **ABATEMENT IN EPIDEMIC.**

**Signs in Army Camps in U. S. That  
Influenza May Decrease.**

(Canadian Press Despatch.)

Washington, Oct. 2.—Public schools  
were closed here to-day because of  
the rapid spread of Spanish influenza.  
More than 3,000 teachers and pupils  
already had been dismissed for ob-  
servation. Other measures will be  
taken to prevent the epidemic ob-  
taining too great a foothold.

For the first time since it became  
epidemic, spread of Spanish in-  
fluenza at army camps showed a  
slight abatement during the twenty-  
four hours ending at noon to-day.  
New cases reported totaled slightly  
more than 13,000, a decrease of one  
thousand from the number report-  
ed the day before. Pneumonia also  
showed a decrease, with only 876  
new cases and 271 deaths.
